The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Candriam Sustainable Equity Europe Small & Mid Caps, a sub-fund of the SICAV Candriam Sustainable

### Class I - Capitalisation shares: LU2258565246

Competent authority: CSSF (Commission de Surveillance du Secteur Financier)  
Management company: Candriam

## OBJECTIVES AND INVESTMENT POLICY

### Principal assets traded:

Shares of small and mid caps companies having their registered office and/or their principal activities in Europe (including United Kingdom and Switzerland).

### Investment strategy:

The fund seeks to achieve capital growth by investing in the principal assets traded and to outperform the benchmark.

The management team makes discretionary investment choices on the basis of an economic/financial analysis process as well as on a Candriam's proprietary analysis of Environmental, Social and Governance (ESG) considerations, both indicative of risks and long-term opportunities.

The fund's sustainable investment objective is to contribute to reducing greenhouse gas emissions through specific targets as well as the integration of climate related indicators in issuer and securities analysis. The fund also aims to have long-term positive impact on environment and social objectives. More specifically the fund aims to achieve overall greenhouse gas emissions at least 30% lower than those of the benchmark.

To achieve these objectives the fund implements a combination of positive selection of the best issuers based on ESG criteria, exclusion of issuers detrimental to these objectives or deemed to prone to controversies.

Issuers are subject to a two-pronged analysis considering how issuers activities contribute to achieving sustainable objectives on the one hand, and how issuers' operations and policies align with the interests of their key stakeholders on the other hand. The result of this analysis forms the basis to define the investable universe and guide fund managers in their portfolio construction.

This analysis is enriched by the results of dialogs led with issuers.

This investment approach will cause the fund to avoid certain issuers due to their poor ESG quality or contribution to attaining sustainability objectives. Whilst the manager believes that such issuers are likely to lose out to more sustainable ones over the

## RISK AND REWARD PROFILE

- The risk level shown reflects the fund's historical volatility, completed where applicable by that of its reference framework. The volatility indicates the extent to which the value of the fund may fluctuate upwards or downwards.
- The historical data may not be a reliable indication for the future.
- The indicated category may vary over time.
- The lowest category does not mean "risk-free".
- There is no guarantee or mechanism to protect the capital.

long term, market volatility and short term market trends could result in such issuers outperforming more sustainable ones over shorter periods.

The fund has not filed for the French SRI Label.

For further information, please refer to Candriam's website and/or the prospectus.

The fund may use derivative products both for investment and hedging purposes (hedging against unfavourable future financial events).

**Benchmark:** MSCI Europe Small Caps (Net Return)

The fund is actively managed and the investment process implies referring to a benchmark index.

Definition of the index:

The index measures the performance of the small cap segment in the European developed markets.

Use of the index:

- in determining risk levels/risk parameters,
- for the purpose of performance comparisons.

Since the fund is actively managed, it does not have the goal of investing in all components of the index, nor that of investing in the same proportions as the components of this index. In normal market conditions, the expected tracking error of the fund will be significant, i.e. above 4%. This measurement is an estimate of the performance gap between the fund and its benchmark index. The greater the tracking error, the greater the deviations from the benchmark index. The actual tracking error depends in particular on market conditions (volatility and correlations between financial instruments) and may therefore deviate from the tracking error expected.

**Redemption of shares:** On request, every day, in Luxembourg.

**Allocation of income:** Reinvestment.

**Recommendation:** This fund may not be suitable for investors who plan to withdraw their capital within 6 years.

**The investor needs to be aware of the following significant risks which are not necessarily adequately taken into account by the indicator:**

- **Risk related to financial derivative instruments:** their use implies risk associated with the underlying assets and can accentuate downward movements via the resulting leverage effect. Hedging strategies using derivatives may not be perfect. Some derivatives may be difficult to value under exceptional markets circumstances.
- **Liquidity risk:** the fund may invest in securities and/or market segments that may be less liquid, in particular in certain market circumstances, with the result that securities cannot be liquidated quickly at reasonable prices.
- **Concentration risk:** given the significant concentration of assets in one market segment and a limited number of issuers, the risks potentially associated with a deterioration of the fundamentals and/or the liquidity of this segment would have a greater impact on the assets compared to a more diversified portfolio of assets.
