

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Candriam Bonds Euro High Yield, a sub-fund of the SICAV Candriam Bonds

Class I2 - Distribution shares: LU2026170345

Competent authority: CSSF (Commission de Surveillance du Secteur Financier)

Management company: Candriam

OBJECTIVES AND INVESTMENT POLICY

Principal assets traded:

Bonds and other debt securities denominated in euro with an issuer or issue rating higher than B-/B3 (or equivalent) from one of the rating agencies (i.e. issuers or issues considered as high risk).

Derivatives of issuers of the same quality.

Investment strategy:

The fund seeks to achieve capital growth by investing in the principal assets traded and to outperform the benchmark index.

The management team makes discretionary investment choices based on economic/financial analyses.

The fund promotes, among other characteristics, environmental and/or social characteristics but does not have sustainable investment as its objective. The analysis of ESG aspects (environment, social, governance) is included in the selection, analysis and global evaluation of companies. The Fund also aims to exclude investments in companies which do not respect certain recognised international standards and principles, or which are significantly exposed to certain controversial activities. Under certain conditions, the analysis and selection process may also be accompanied by active involvement based on dialogue with the companies. For more information, please see the management company's website and/or the prospectus.

The fund may use derivative products both for investment and hedging purposes (hedging against unfavourable future financial events).

Benchmark: ICE BofA BB-B Euro Non-Financial High Yield Constrained Index (Total Return)

The fund is actively managed and the investment process implies referring to a benchmark index.

Definition of the index:

The index measures the performance of below investment-grade (BB1 to B3), EUR denominated non-financial corporate bonds, issued on domestic markets in the eurozone, or Eurobonds, with issuer exposure capped at 3%.

Use of the index:

- as an investment universe. In general, most issuers of the financial instruments in the fund portfolio are part of the index. This being said, investments outside the index are authorised,

- In determining risk levels/risk parameters,

- For the purpose of performance comparisons,

- For the purpose of calculating performance fees for certain share classes.

Deviation of portfolio composition in respect of the index:

Since the fund is actively managed, it does not have the goal of investing in all components of the index, nor that of investing in the same proportions as the components of this index.

In normal market conditions, the expected tracking error of the fund will be moderate to significant, i.e. between 0.75% and 3%.

This measurement is an estimate of the performance gap between the fund and its benchmark index. The greater the tracking error, the greater the deviations from the benchmark index. The actual tracking error depends in particular on market conditions (volatility and correlations between financial instruments) and may therefore deviate from the tracking error expected.

Redemption of shares: On request, every day, in Luxembourg.

Allocation of income: Distribution.

Recommendation: This fund may not be suitable for investors who plan to withdraw their capital within 3 years.

RISK AND REWARD PROFILE

• The risk level shown reflects the fund's historical volatility, completed where applicable by that of its reference framework. The volatility indicates the extent to which the value of the fund may fluctuate upwards or downwards.

• The historical data may not be a reliable indication for the future.

• The indicated category may vary over time.

• The lowest category does not mean "risk-free".

• There is no guarantee or mechanism to protect the capital.

The investor needs to be aware of the following significant risks which are not necessarily adequately taken into account by the indicator:

• **Credit risk:** the fund is exposed to the risk of default of an issuer in terms of honouring the payment of coupons and/or the repayment of the amount borrowed. This risk is higher as the

fund may invest in high-yield debt issues whose issuers are considered risky.

• **Counterparty risk:** The fund may use OTC derivative products and these may represent a counterparty risk, i.e. the inability of the counterparty to honour its commitments to the fund. This counterparty risk could be fully or partially hedged by the receipt of guarantees.

• **Risk related to financial derivative instruments:** their use implies risk associated with the underlying assets and can accentuate downward movements via the resulting leverage effect. Hedging strategies using derivatives may not be perfect. Some derivatives may be difficult to value under exceptional markets circumstances.

• **Liquidity risk:** the fund may invest in securities and/or market segments that may be less liquid, in particular in certain market circumstances, with the result that securities cannot be liquidated quickly at reasonable prices.

• **Sustainability risk:** refers to any event or situation in the environmental, social or governance domain that could affect the performance and/or the reputation of the issuers in the portfolio. The sustainability risk may be specific to the issuer, depending on its activities and practices, but it may also be due to external factors.

The charges you pay are used to pay the costs of running the fund, including the costs of selling and distributing its shares. These charges reduce the potential growth of your investment.

Entry and exit charges:

The charges shown are maximum figures. In some cases, you might pay less.

You can find out the actual amounts from your financial adviser or distributor.

Ongoing charges:

The figure shown is an estimate based on the expected total amount of charges as there is insufficient historical data to provide a useful indication on ongoing charges. The annual report for each financial year will include details of the exact charges incurred.

It does not include a performance fee or the portfolio transaction costs, except those billed by the custodian bank and the cases where entry/exit charges are paid by the fund when buying or selling units in another fund.

More details on charges are found in the relevant sections of the prospectus accessible via www.candriam.com.

PAST PERFORMANCE

There is insufficient data to provide a useful indication on past performance.

Year of introduction of the share: 2019.

Currency: EUR.

Index: ICE BofA BB-B Euro Non-Financial High Yield Constrained Index (Total Return). The index may change over time without implying a major change in strategy. The performance reported for one or more years may therefore differ from the performance of the relevant index for the corresponding year(s).
