This product is authorised in Luxembourg. Candriam is approved in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

This key information document is valid as at 2024-03-01.

## WHAT IS THIS PRODUCT?

**Type:** This product is a share class (R) of a sub-fund (Dynamic Asset Allocation) of an investment company with variable capital (SICAV) under Luxembourg law (Candriam L), Undertakings for Collective Investment in Transferable Securities (UCITS).

**Term:** Open-ended.

### Objectives:

#### Principal assets traded:

Equities, bonds, cash, money market instruments from all types of issuers on the global markets, through investment funds and/or derivatives.

#### Investment strategy:

The fund seeks to achieve capital growth through diversified investment, prioritising equity funds, and to outperform the benchmark.

Within the limits of the fund's investment objective and policy, the management team makes discretionary investment choices in the portfolio based on analyses of the characteristics and growth prospects of the assets traded. The proportion of net assets invested in equities will in principle be a majority. However, it may be strongly reduced depending on the manager's expectations regarding movements in the financial markets and in order to reduce the risk to the investor. Neutral weighting in equities in the portfolio is therefore about 75% (the neutral weighting is the theoretical proportion of the fund assets invested in equities, using which the management team determines the distribution of fund assets on the basis of its market expectations).

The fund promotes, among other characteristics, environmental and/or social characteristics but does not have sustainable investment as its objective.

The analysis of ESG (environment, social, governance) aspects is integrated in the selection and global allocation of the underlyings. As a result, the fund invests at least 75% of the net assets in funds which themselves have sustainable investment as their objective and/or promote, among other characteristics, environmental and/or social characteristics. The Fund also aims to exclude investments in companies which do not respect certain recognised international standards and principles, or which are significantly exposed to certain controversial activities. In certain conditions, the analysis and selection process may be accompanied – where applicable indirectly through the underlying fund(s) – by active involvement, in particular dialogue with companies and voting as the shareholder at AGMs. For more information, please see the management company's website and/or the prospectus. The fund may make use of derivative products for both investment and hedging purposes (to protect against future unfavourable financial events).

**Benchmark:** 25% Bloomberg Euro-Aggregate 1-10 Year Index (Total Return) + 22.5% MSCI EMU (Net Return) + 22.5% MSCI World ex Europe (Net Return) + 18.75% MSCI Europe ex EMU (Net Return) + 11.25% MSCI Emerging Markets (Net Return).

The fund is managed actively and the investment approach implies a reference to a benchmark (the index).

#### Benchmark definition:

Bloomberg Euro-Aggregate 1-10 Year Index: measures the performance of EUR denominated investment grade bonds with a maturity of 1 to 10 years.

MSCI EMU: measures the performance of the large and mid capitalisation equity segment in developed markets in the European Economic and Monetary Union (EMU).

MSCI World ex Europe: measures the performance of the large and mid capitalisation equity segment in developed markets (outside Europe).

MSCI Europe ex EMU: measures the performance of the large and mid capitalisation equity segment in countries with developed markets in Europe (outside the European Economic and Monetary Union).

MSCI Emerging Markets: measures the performance of the large and mid capitalisation equity segment across countries with emerging markets.

#### Use of the benchmark:

- in determining risk levels / parameters,
- to compare performance.

#### Divergence of portfolio composition from the benchmark:

As the fund is managed actively, it does not aim to invest in each component of the index nor to invest in the same proportions as the components of the index.

In normal market conditions, the expected tracking error of the fund will be limited to moderate, namely between 0.5% and 3%.

This measure is an estimation of the divergence of the fund's performance compared to the performance of the benchmark. The greater the tracking error, the greater the deviations from the benchmark index. The actual tracking error depends in particular on market conditions (volatility and correlations between financial instruments) and may therefore differ from the expected tracking error.

**Repayment of shares:** On demand, every day, in Luxembourg.

**Allocation of income:** Reinvestment.

### Intended retail investor:

This product is for investors who meet the conditions for accessing the product in question (see prospectus) with any level of knowledge and experience who are looking for Capital Growth. This product can be used as a core holding or a component of a diversified portfolio for investments with an investment horizon of 5 years. Investors should understand the product risks and only invest if they can bear potentially substantial losses.

### General information:

**Depository bank:** CACEIS Bank, Luxembourg Branch.

### Other information:

This document provides a description of a share class of a sub-fund of Candriam L. The prospectus and periodical reports are established for all the sub-funds. There are other share classes and these are listed in the prospectus.

Investors may apply for the conversion of their shares into shares of another class of the same sub-fund or into shares of a class of another sub-fund of the fund, based on the eligibility criteria and following the procedures available through their financial intermediary.

The sub-fund is only liable for the debts, liabilities and obligations that can be charged to it.

Additional information about the fund can be found in the prospectus and the periodical reports, which may be obtained free of charge on request from Candriam or viewed at any time on the website [www.candriam.com](http://www.candriam.com). These documents are available in one of the languages approved by the local authority of each country where the fund is authorised to market its shares or in a common language in the international finance sphere. All other practical information, in particular the latest share price, is available from the places shown above.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

**Other risk(s) materially relevant not included in the summary risk indicator:** Credit. Counterparty. Derivatives. Emerging markets. Sustainability.

This product does not include any protection from future market performance so you could lose some or all of your investment.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and/or a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 01/2022 and 01/2024.

Moderate: This type of scenario occurred for an investment between 08/2018 and 07/2023.

Favourable: This type of scenario occurred for an investment between 11/2016 and 10/2021.

Recommended holding period: Example Investment:		5 years 10 000 EUR	
		If you exit after 1 year	If you exit after 5 years
<b>Scenarios</b>			
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress</b>	<b>What you might get back after costs</b>	<b>3 380 EUR</b>	<b>3 450 EUR</b>
	Average return each year	- 66.17%	- 19.18%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	<b>8 300 EUR</b>	<b>9 180 EUR</b>
	Average return each year	- 16.95%	- 1.70%
<b>Moderate</b>	<b>What you might get back after costs</b>	<b>10 130 EUR</b>	<b>12 480 EUR</b>
	Average return each year	1.26%	4.53%
<b>Favourable</b>	<b>What you might get back after costs</b>	<b>12 990 EUR</b>	<b>15 100 EUR</b>
	Average return each year	29.89%	8.59%

## WHAT HAPPENS IF CANDRIAM IS UNABLE TO PAY OUT?

As the Funds' assets are held with the depositary, they are not part of the assets of Candriam in case of bankruptcy and cannot be seized by the creditors of Candriam. Nevertheless, investors run the risk to suffer a financial loss in case of the default of Candriam.

In case of default of the depositary, the risk of a financial loss is mitigated to some extent as the Fund's assets are legally segregated from the assets of the depositary.

The potential financial loss associated with the default of Candriam is not covered by an investor compensation or guarantee scheme.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	<b>485 EUR</b>	<b>1 235 EUR</b>
Annual cost impact (*)	4.9%	2.0% each year

\* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.5% before costs and 4.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

If the fund is part of another product, such as an insurance product, the costs shown here do not include any additional costs you may incur.

## Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	3.50% maximum of the amount you pay in when entering this investment.	Maximum 350 EUR
<b>Exit costs</b>	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 EUR
<b>Ongoing costs taken each year</b>		
<b>Management fees and other administrative or operating costs</b>	0.95% of the value of your investment per year. This is an estimate based on actual costs over the last year.	113 EUR
<b>Transaction costs</b>	0.22% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	22 EUR
<b>Incidental costs taken under specific conditions</b>		
<b>Performance fees</b>	There is no performance fee for this product.	N/A

**Switch fee:** 0%. For more information about how to exercise that right, see section "General information" and/or refer to the prospectus.

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

**Recommended holding period:** **5 years**

The choice of recommended holding period depends on the types of the underlying investments and on the associated degree of risk, which may be higher or lower. For example "equity" type products (higher risk) generally have a recommended holding period of six years (long term), and "bonds or money market" type products (lower risk) have a shorter recommended holding period (generally between two and four years for bond products or less than one year for money market products - medium term/short term). "Mixed" type products generally have a recommended holding period of between three and five years depending on the weighting of the types of underlyings. "Alternative" type products generally have a recommended holding period of three years.

Investors may request redemption of their units at any time under the conditions set out in "What will this investment cost me? ". The shorter the holding period in relation to the recommended period, the greater the potential impact of any charges on the performance profile.

## HOW CAN I COMPLAIN?

Complaints about this product or about the conduct of the product manufacturer or the person advising on, or selling, the product:

Postal address: Candriam, SERENITY – Bloc B, 19-21, route d'Arlon – L-8009 Strassen
