### Details about the SICAV

The Annual General Meeting of the Shareholders of the SICAV is held each year at the registered office of the SICAV or at any other place in Luxembourg as specified in the convening meeting notice. It shall take place within 6 months after the financial year-end.

Notice for all General Meetings is sent to all registered shareholders by registered mail at their address specified in the share registrar, at least 8 days before the General Meeting. Such notice shall indicate the time and place of the General Meeting and the conditions for entry, the agenda and the quorum and majority required under Luxembourg law.

These notices will also be published in the press of the countries where the SICAV is marketed in which the shares of the SICAV are marketed, if the legislation of those countries so requires.

The reports to the shareholders for the previous financial year and results are available at the registered office of the SICAV. The financial year of the SICAV ends on December 31 of each year.

A list including the transactions (sales and purchases) in the investment portfolios is available free of charge at the SICAV's registered office.

The prospectus, Key Investor Information Documents, the SICAV's Articles of Incorporation and financial reports are kept for public inspection, free of charge, at the SICAV's registered office.

## Report of the Board of Directors

### Economic and financial background

In the United States, the growth outlook for 2021 continued to improve after the announcement on the efficacy of vaccines at the end of 2020, the victory of the Biden-Harris duo and the Democratic majority in both chambers. The ISM indicators for both the manufacturing and non-manufacturing sectors increased substantially. GDP grew 1.5% quarter to quarter compared with fourth-quarter 2020. President Biden pushed for Congress to pass his \$1.9 trillion American Rescue Plan, which went through at the end of March. The growth in economic activity combined with consequential fiscal support gave a strong boost to the 10-year rate, which ended the quarter at 1.75%, up 83 bp from end-December 2020. The stock market gained 5.8% over the same period. The ISM manufacturing and non-manufacturing indicators remained above 60 throughout second-quarter 2021. The unemployment rate fell month after month to 5.9% in June. Household residential investment in the second quarter of 2021 was 15.8% higher than in fourth-quarter 2019, while house prices rose 17.4% year on year. The Brent barrel price rose from \$59 to \$75 between early April and end-June owing to the acceleration in growth in the USA (+1.6% qoq) and worldwide as well as strict production control on the part of OPEC+. Through a combination of rising energy and commodity prices and a "favourable" base effect, inflation reached 5% in May and core inflation 3.8%, leading the ten-year rate to hover around 1.7% until mid-May. Bond market tensions eased following "less strong" job creation data (269,000) in early May. The 10-year rate fell 30 bp to 1.44% over the quarter. Bolstered by revitalised growth, the stock market gained 8.2% compared with the end of March. During the third quarter, the cap on the vaccination rate combined with the spread of the Delta variant caused a sharp increase in the average number of daily cases, raising fears of a slowdown in activity. The ten-year interest rate temporarily fell below 1.2%. However, the economic environment remained buoyant: in the third quarter, job creation topped the 1.6 million mark and ISM indicators remained on average above 60. OPEC+ countries agreed to increase oil production very gradually through end-December 2021. Transport costs (maritime and otherwise) accelerated sharply. Port unloading began to bottleneck on the West coast, as did goods transport, owing to a lack of HGV drivers. Energy prices increased, with the WTI rising to \$75 per barrel at end-September. These different developments led to inflation remaining above 5% and 4% for core inflation. However, it was only from the Federal Reserve's announcement on 22 September of a slowdown in asset purchases in the coming months that the 10-year rate rose to close the quarter at 1.53%, an increase of 8 bp compared to the second quarter. The stock market ended the quarter up 0.2% to 4308. After a period of slight turbulence in the third quarter (GDP growth of only 0.6 per cent qoq), markets are finding a second wind in the fourth quarter. While the ISM manufacturing index remained strong, the services index is clearly accelerating. In November, the latter reached its highest level since the survey was established in 1997. The unemployment rate fell once more to 4.2%. Continued strong demand for goods and the normalisation in the demand for services, as well as various bottlenecks, are putting pressure on prices. Inflation and core inflation stood at 6.8% and 5% respectively in November. The increase in real estate prices is above 15% yoy. At its meeting on 15 December, the Federal Reserve published its new macroeconomic projections for 2022, which revise growth and inflation upwards and the unemployment rate downwards. These various changes led the bank to announce an acceleration of its tapering programme. As a result, continued growth and the positive outlook for 2022 are pushing the stock market upwards. At 4766, the S&P 500 ended 2021 up 26.9% compared to the end of December 2020. The 10-year rate increased 59 bp over the year, ending at 1.5%.

In the eurozone, in first-quarter 2021, the global manufacturing recovery bolstered industrial activity in Europe, resulting in an increase in the manufacturing PMI (well above 50). But the services PMI remained lacklustre as the health situation improved only marginally in the first quarter owing to a sluggish start to the vaccination campaign. As a result, entire swathes of the service sector remained at a standstill. Overall, GDP contracted 0.2 % qoq after falling 0.4% in fourth-quarter 2020. Nevertheless, at the end of March, due in part to a similar trend in interest rates as in the United States, the German 10-year rate rose 24 bp to -0.33% compared with the end of 2020. Meanwhile, the stock market gained 8.7% relative to end-2020. In second-quarter 2021, exports and export orders rose sharply, as did indicators of corporate equipment investment intentions. The unemployment rate fell slightly to 7.8% in June, compared with over 8% in mid-2020. The eurozone manufacturing PMI remained above 60. Mobility indicators accelerated sharply starting in April. The services sector gradually came out of lockdown over the quarter, the PMI for the sector rising from 50.5 in April to 58.3 in June. The reduction in lockdown measures led to a 2.2% qoq increase in GDP. The German 10-year rate increased 8 bp to -0.25% and the stock market gained 4.6%. But industrial production and the ability of businesses to rebuild inventories had for several months been negatively impacted by bottlenecks (on semiconductors), supply disruptions (stemming from the resurgence of the Delta variant in Asia) and the "zero COVID-19 cases" policy applied in China, among other regions. As a consequence, the German 10-year yield declined 18 bp compared with end-June. On the other hand, with the normalisation of mobility and the maintenance of business and household confidence at a high level in early September, the ECB announced a slight reduction in the pace of asset purchases under the PEPP. From the end of August, shortages and the considerable increase in energy prices (including gas and electricity) drove eurozone inflation above 3%, which, despite continued robust economic activity (PMI indices above 50), curbed the rise of the stock market and pushed long rates upwards. Finally, the stock market gained 0.2% over the quarter, while the 10-year rate increased 5 bp to -0.19%. Thanks to the improvement in employment and the normalisation of activity in the services sector, and despite bottlenecks in supply chains, GDP grew by 2.2% qoq. On the other hand, equipment shortages and, more recently, labour shortages are becoming increasingly prevalent in the eurozone and are weighing on production. Due to its industrial structure, Germany is the most affected by this phenomenon. Until now, however, PMIs in both manufacturing and services have remained positive. Consumer confidence remains high. The labour market is normalising. At the end of November, the appearance of a new variant (Omicron) led governments to take new measures aimed at either mobility or vaccination. Despite this new uncertainty, on 16 December, the European Central Bank announced that it would not extend net asset purchases under the Pandemic Emergency Purchase Programme (PEPP) beyond 31 March 2022. It also decided to modify its purchases under the Asset Purchase Programme (APP). It also decided to postpone the date - at least until the end of 2024 - from which it could stop reinvesting the maturities of maturing bonds. However, a change in the key rate is not on the agenda in the eurozone, despite inflation of 4.9% in November. The trend is different in the United States. Core inflation is at only 2.6%. Wage growth in eurozone countries is much more moderate than in the United States. Overall, the German 10-year rate closed the year at -0.18%, 40 points higher than at the end of 2020. In contrast with 2020, the stock market posted an increase of 20.1%.

## Report of the Board of Directors

### Economic and financial background (Continued)

#### Market Environment

2021 was marked by higher levels of volatility across financial markets. The coronavirus pandemic continued to impact markets as the 1<sup>st</sup> half of the year saw advancement of vaccine programs and re-openings. Over the second half, however, the omicron variant of the Covid virus led to shutdowns, curfews across the globe. In spite of this, the macro-economic outlook in developed markets was mostly positive over the year, though the slowdown in China (which was more pronounced in the second half of the year) did have some negative impact. An extremely important element which was present across the entire year was inflation, which was trending at elevated levels. A significant contributor to this phenomenon was the high level of commodity prices, represented by oil went from \$50/barrel to \$75/barrel, which had an impact on the cost of goods. In addition, the world continued to face a supply crunch as a result of the numerous supply chain issues that were witnessed across the globe.

The response to this crisis both from the fiscal and monetary front had been extraordinarily strong and continued to break record levels over the 1<sup>st</sup> half of 2022. The Biden fiscal support plan was rolled out early in the year and the ECBs “next gen” program continued to deliver throughout 2022. Furthermore, central bank support was omnipresent in H1 as both the FED and the ECB maintained their Quantitative easing programs, while holdings rates low. The second half of the year, however, saw a sharp pivot in monetary policy. Both the Fed as well as the ECB adopted hawkish rhetoric, indicating lower support and eventually announced the tapering of their bond-buying programs. The Fed indicated that a lift-off in rates could take place in 2022, noting that the higher inflation was no longer deemed transitory. Rate hikes were also announced by the Bank of England as well as several EM central banks. China appeared to be an outlier, as the Peoples Bank of China maintained its dovish stance in the face of the growth slowdown. Furthermore the country also had to deal with the turmoil in the real-estate sector, with issuers such as Evergrande suffering as a result of tighter regulations and weak balance sheets. This turbulence impacted credit as well as EM debt markets.

While political risk subsided somewhat in 2021 (in the US in particular), it was by no means absent. Italy and Germany witnessed a change in government, though these were relatively well received by the markets. Trade wars were also present as de-globalisation continued to cast a shadow on economies and the fallout from Brexit remained a source of concern. What we also witnessed on the back of the lower monetary support was the return of dispersion. Indeed, in an environment where central bank influence was diminished, it was the idiosyncratic risk that came to the forefront as fundamentals began to gain increasing importance

#### Government Bonds

Yields on developed market sovereigns witnessed a volatile year, beginning with a sharp rise in the 1<sup>st</sup> quarter on the back of the fast advancing vaccine programs and potential reopening of economies. The rise in inflation, driven by the sharp increase in commodity prices also contributed to the upward trend. The US 10 year rates rallied strongly to over 1.7% while the German rates also moved upwards to -0.30. While the core-eurozone rates continued to rise throughout Q2, the US economy lost some steam and vaccination programs reached a plateau, thereby driving rates lower to 1.2%. The second half of the year was marked by a rise in rates, that accelerated over the 4<sup>th</sup> quarter. Indeed, the hawkish rhetoric of the Fed and the ECB as well as increased inflationary pressures brought forward the expected rise in rates. In the fourth quarter, the announcement of the tapering programs of DM central banks and rise in rates of certain EM central led to a spike in rates, driving volatility higher as well. Core rates ended the year with negative performance over 2021. Peripheral sovereigns followed a similar trend, though the movements were perhaps slightly less sharp in amplitude as the search for yield continued to drive investors towards the asset class. Countries like Australia and Canada (commodity reliant dollar bloc) posted similar performance as the US rates while New Zealand, where central bank operated a rate hike earlier on, saw consistent increase in its 10 year yields.

#### Inflation-Linked Bonds

In 2021, the extent of the inflation upturn took a lot of investors by surprise. While the first phase of the pandemic in 2020 weighted negatively on inflation, this year was clearly inflation-positive. Multiple supply-chain disruptions, the upturn in commodities, strong demand and base effects all drove inflation sharply higher across markets. This was further exacerbated by the low-rate environment and important fiscal stimulus on both sides of the Atlantic. In Europe, headline inflation reached 5% YoY while in the US headline and core inflation ended the year at respectively 7% and 5.5% YoY. In response multiple DM central banks started to adjust their accommodative stance in H2 2021 in various degrees (FED, BOE, Norges Bank, ECB...). Performance-wise, inflation breakeven rates massively increased across DM linkers markets with Europe outperforming its DM peers. The 5y US breakeven rates peaked at 3.2% in November before getting somewhat dampened towards year-end by worries on US fiscal stimulus and more hawkish FOMC communication. In Europe, 5y Germany breakeven rates increased from 0.7% to close to 1.7% at year-end. Looking to 2022, inflation should start to decelerate somewhat but remain at high levels, certainly over the first half of the year.

#### Corporate Investment Grade

2021 was a volatile year for the Euro Corporate investment grade market. The year was marked by the omnipresence of the coronavirus through different variants, which forced countries around the globe to periodically take measures that brought on additional disruptions that were clearly exacerbated during the second half of the year. Central bank support was present throughout the year though rhetoric was fairly uneven, with hawkish language creeping in over Q4, yet again adding to volatility. The major theme over 2021 was clearly inflation, driven by commodity price rise and supply chain constraints, which challenged markets as well as monetary policies. Investment grade issuer fundamentals remained well-oriented throughout the year, as companies continued to benefit from a highly accommodative monetary environment, though over the second half, idiosyncratic risk began gaining prominence, thereby promoting dispersion amongst issuers.

Overall, the ICE BofA-Merrill Lynch Euro Corporate index delivered slightly negative performance over the 1<sup>st</sup> half of 2021, marked by the sharp rise in core rates over the 1<sup>st</sup> quarter, that impacted IG market performance. Over the months of June through July of 2021, IG markets rallied strongly as central banks maintained their accommodative stance and issuer fundamentals remained strong (as witnessed by the number of rising stars throughout the first 2 quarters). Over the rest of the year, hawkish central bank rhetoric combined with the arrival of the Omnicron variant of the Covid that resulted in material turbulence. The ICE BofA-Merrill Lynch Euro Corporate index returned -1% over the course of the year, with investors still flocking to the asset class which benefited from the search of yield theme as well as from the ECB backstop that remained present through 2021.

## Report of the Board of Directors

### Market Environment (Continued)

#### Corporate High Yield

2021 was a volatile year, and a tale of two halves for the High Yield market. The year was marked by the omnipresence of the coronavirus through different variants, which forced countries around the globe to periodically take measures that brought on additional disruptions that were clearly exacerbated during the second half of the year. Central bank support was present throughout the year though rhetoric was fairly uneven, with hawkish language creeping in over Q4, yet again adding to volatility. The major theme over 2021 was clearly inflation, driven by commodity price rise and supply chain constraints, which challenged markets as well as monetary policies. High yield market fundamentals remained well-oriented throughout the year, as companies continued to benefit from a highly accommodative monetary environment, though over the second half, idiosyncratic risk began gaining prominence, thereby promoting dispersion amongst high yield issuers. Overall, the ICE BofA-Merrill Lynch Global High Yield BB/B 3% constrained index Euro Hedged, excluding financials posted a performance of 1.30%, though the gyrations were considerable.

The 1st quarter of 2021 was characterized by an overall positive mood in the markets on the back of expectations of increased fiscal stimulus, growing vaccination drives and an overall positive macro-economic context. Volatility remained low throughout the quarter and even over the 1st half of the year, with the vaccination rollout gaining momentum and additional fiscal stimulus expected in the US. The overall trends of the 1st quarter of 2021 continued through the second quarter, though unlike Q1, US rates did not continue their rise, and in fact ended the quarter marginally lower, thereby surprising market expectations. Issuer fundamentals remained well oriented as results were strong and above expectations and most companies expected stronger results 2021. If most issuers kept a credit-friendly balance sheet management, we began to see some others turning into more equity friendly mode (Dividend deals, share buyback programs or debt funded M&A).

The second half of the year saw a sharp surge in volatility, impacting the performance of high yield credit markets. Sovereign yield rallied substantially, as a result of hawkish rhetoric from central banks, eventually translating into tapering of quantitative easing programs in the US and EU and rise in rates across certain EM countries. The Fed decided to remove the word 'transitory' from its communication on inflation and brought up "faster tapering" as a possibility. The volatility was also exacerbated by slower growth in China, the Evergrande fallout and the Delta variant spreading in Europe. Although fundamentals remained well-oriented on an organic basis and default rates remained low, debt-funded acquisitions continued to weigh on credit spreads as illustrated by the offer from private-equity firm KKR to take over Telecom Italia in a EUR 45bn transaction. Furthermore, supply chain issues, inflation costs and debt-funded M&A, and Q3 results were a source of dispersion among sectors and issuers alike.

#### Convertible Bonds

The year 2021 proved to be challenging for convertibles investors. While the year began with a bang, returns reversed in the following months as a rise in interest rates weighed on the valuations of growth names, which make up a significant portion of the convertible universe (particularly in Asia and the US).

Indeed, while the sector composition of the market favours high-growth sectors such as technology, consumer discretionary and media, last year's leaders were energy and materials, which are more marginally represented in the index. On the other hand, ADRs, which drove the Asia convertible market's strong gains in 2020, have fallen dramatically due to new regulations targeting Chinese tech and online education names. Although historically converts have been positively associated with rising inflation and interest rates, they are more at risk today given the market's shift to high-growth in recent years. However, convertible bonds still offer investors a number of important benefits, including asymmetric exposure to their underlying stocks and lower durations than bonds, some key features in a market fraught with fragility risks and concerns over climbing yields. In terms of primary issuance, the global convertible market has attracted a record levels of borrowing of \$307bn over the past two years, including \$148bn for the year 2021, the fifth-most in a year since 1998. Regionally, issuers from the US, Europe, Asia, and Japan priced \$84bn, \$23bn, \$33bn, and \$7bn of new convertible paper, respectively, a record for Asia and an above-average annual total for all other regions.

#### Emerging Markets

In Q1, EMD HC (-4.5%) posted one of its worst quarters on record in total return terms as growth exceptionalism, fast and competent vaccine rollout and further fiscal stimulus in the US drove 10Y US Treasuries 82bps higher to 1.74% by the end of March. Energy and base metals, that typically correlate positively with EM debt performance, retained an upward trajectory over the quarter in line with broader realization of a structural supply imbalance across Oil and Copper/Iron Ore markets and OPEC support for Oil. Oil printed an impressive 22.6% return during 1Q21 with Iron Ore and Copper also performing well as US activity indicators maintained a recovery momentum and the US growth outcome for the full year was revised up towards mid 6%. The quarter was eventful in terms of rise of political risk premia although most EM stories were contained and did not contaminate the rest of the asset class.

EM HC Sovereigns posted an impressive +4% return in Q2, helped by a rally in UST yields (-28bps), while spreads posted a more modest 19bps tightening. EM corporates underperformed sovereigns, mainly due their shorter duration profile, while IG underperformed HY. Oil skyrocketed by more than 23%, as DM economies reopened, strengthening demand, and the OPEC maintained a tight control of supply. Other commodities (copper +7.3%, iron ore +23%) maintained an upward trend. The USD rallied until the end of May, then strengthened in June, as the FOMC signaled a more hawkish bias and markets became more nervous about growth prospects with the appearance of the new Delta Covid variant.

EMD HC (-0.7%) gave back some of its second quarter gains over the summer months as risks to the reflation trade rose globally. A Delta wave in the US eroded expectations for extended strong recovery and led to a knee-jerk rally in 10Y US Treasuries that traded close to 1% by early August. Chinese state intervention in different sectors of the economy and the introduction of a yet to be clarified long term goal of common prosperity introduced material risk premiums across Chinese assets and drove up concerns over the country's medium term growth trajectory. Globally, concerns over slowing growth and persistent inflation set in by the end of the quarter. The trade-weighted US Dollar managed to post gains against EM currencies despite the extended support from hawkish EM central banks unwilling to look through the temporary food and energy inflation shocks and proceeding with hiking cycles.

EMD HC (-0.4%) optically declined only marginally as flat Treasury and muted Spread returns concealed material underperformance of HY versus IG as asset class risks progressively rose during the quarter. The discovery of a more contagious Covid-19 variant in South Africa in November and its potentially adverse impact on the growth recovery accelerated a correction in the asset class already traumatized by Chinese common prosperity policies aimed at de-levering and restructuring private players in multiple sectors, rising debt sustainability concerns in select EM HY with limited funding options (Ghana, El Salvador, Sri Lanka), and rising geo-political (Ukraine) or policy risks (Argentina, El Salvador, Turkey).

## Report of the Board of Directors

### CANDRIAM BONDS Euro High Yield

#### Market and Performance Commentary

2021 was a volatile year, and a tale of two halves for the Euro High Yield market. The year was marked by the omnipresence of the coronavirus through different variants, which forced countries around the globe to periodically take measures that brought on additional disruptions that were clearly exacerbated during the second half of the year. Central bank support was present throughout the year though rhetoric was fairly uneven, with hawkish language creeping in over Q4, yet again adding to volatility. The major theme over 2021 was clearly inflation, driven by commodity price rise and supply chain constraints, which challenged markets as well as monetary policies. High yield market fundamentals remained well-oriented throughout the year, as companies continued to benefit from a highly accommodative monetary environment, though over the second half, idiosyncratic risk began gaining prominence, thereby promoting dispersion amongst high yield issuers. Overall, the ICE BofA-Merrill Lynch Euro High Yield BB/B 3% constrained index, excluding financials posted a performance of 2.86%, with yields compression over the first half of the year (to 2.1%) before widening sharply to 2.72% over the second half. Spreads also followed a similar path, ending the year at 315 bps, from 266 bps in the first half of 2021.

The 1st quarter of 2021 was characterized by an overall positive mood in the markets on the back of expectations of increased fiscal stimulus, growing vaccination drives and an overall positive macro-economic context. Volatility remained low throughout the quarter and even over the 1st half of the year, with the vaccination rollout gaining momentum and additional fiscal stimulus expected in the US. Most countries, continuing to experience strict lockdowns, had to implement additional travel restrictions to contain the increasing number of new variants that appeared more infectious and more resistant against the vaccines. On the fiscal front, the 1.9 trillion dollars stimulus package in the US was on track to be approved in March. Finally, the commodity complex saw a strong rally, as Brent and WTI futures increased substantially, supporting inflation numbers and leading to a rise in US and core Eurozone rates. In the face of the rise in inflation, improved macroeconomic outlook, rates moved sharply upwards, though credit markets – supported by central banks – continued to deliver positive performance. The overall trends of the 1st quarter of 2021 continued through the second quarter, though unlike Q1, US rates did not continue their rise, and in fact ended the quarter marginally lower, thereby surprising market expectations. Issuer fundamentals remained well oriented as results were strong and above expectations and most companies expected stronger results 2021. If most issuers kept a credit-friendly balance sheet management, we began to see some others turning into more equity friendly mode (Dividend deals, share buyback programs or debt funded M&A).

The second half of the year saw a sharp surge in volatility, impacting the performance of high yield credit markets. Sovereign yield rallied substantially, as a result of hawkish rhetoric from central banks, eventually translating into tapering of quantitative easing programs in the US and EU and rise in rates across certain EM countries. The Fed decided to remove the word 'transitory' from its communication on inflation and brought up "faster tapering" as a possibility. The volatility was also exacerbated by slower growth in China, the Evergrande fallout and the Delta variant spreading in Europe. Although fundamentals remained well-oriented on an organic basis and default rates remained low, debt-funded acquisitions continued to weigh on credit spreads as illustrated by the offer from private-equity firm KKR to take over Telecom Italia in a EUR 45bn transaction. Furthermore, supply chain issues, inflation costs and debt-funded M&A, and Q3 results were a source of dispersion among sectors and issuers alike. The 4th quarter saw the emergence of the Omicron variant as well as the central bank pivot that high yield markets suffer somewhat. Towards the end of the year, core rates climbed significantly as Euro HY markets witnessed more volatility.

The CANDRIAM BONDS Euro High Yield Fund posted a performance of +2.39% (I Share EUR non distributing) over the year, underperforming its benchmark (ICE BofA-Merrill Lynch Euro High Yield BB/B 3% constrained index, excluding financials) by -0.47%, on net basis. A significant portion of the underperformance can be attributed to our cautious positioning in the first half of the year, as we entered with a prudent approach to some of the weaker credits that rallied very strongly on the back of the very accommodative stance of the central banks. Dispersion was low over the 1st half of the year and our extremely selective approach suffered somewhat. Issuers such as Pemex (which we excluded for ESG issues), Casino (which we deem to be extremely weak in terms of governance) and Carnival (which we felt would be very challenged by the Covid situation) were amongst the strongest performers. Our underweight to these issuers was a source of weak risk-adjusted returns. The underperformance was however limited as our overweights in Verisure (High conviction pick with double digit EBITDA growth and strong deleveraging profile) and Autostrade (a rising star candidate in our opinion based on our bottom-up analysis) did deliver strong returns. We took advantage of primary market activity to increase our credit duration over the 1st quarter, while deciding to maintain a lower interest-rate sensitivity. In February and in March, we used the weakness in corporate hybrids to increase further our exposure as we continued to find valuations attractive versus senior and traditional HY. We increased further our exposure to the energy sector that we believe will benefit from the reopening of economies and reduced our cautious stance on airlines by focusing on low cost carriers that are expected to recover faster. We also reduced our prudent stance on Covid sectors that benefit from improved liquidity buffers like airlines, toll road operators and commercial real estate. In the second quarter, in terms of positioning, we reduced our exposure to BBs with high-duration risk and tight spreads, and used the primary market to increase our exposure to high single-B convictions. We used the stronger supply to further increase our credit exposure, both on the primary and on the secondary market. Towards the end of the quarter, we took advantage of the outperformance of airlines to take some profit on our overweights (Lufthansa, IAG), as we find valuations less attractive and expect the recovery to be slowed by new variants bringing back travel restrictions.

Over the second half of the year, the fund outperformed the benchmark. As dispersion returned to the market, certain issuers with weak balance sheets suffered. A material portion of the outperformance came thanks to our underweights in issuers that struggled on an idiosyncratic basis. Issuers such as Telecom Italia, Adler and Pemex, where the Fund had full underweight and no exposure, suffered considerably, thereby generating strong relative returns. Additionally, our allocation to select issuers such as Illiad, (which we added through the primary market), Altice France (which has been a long standing conviction) and Cellnex (a potential rising star based on our analysis). In August, we used the rally to reduce our credit exposure and to increase our cash position as we anticipated a heavy pipeline in September and October. In September, we used the rally during the first two weeks of the month to further reduce our credit exposure and to increase our cash position. And from mid-September, we started to invest selectively in the primary market and over the 4th quarter, we increased our net credit exposure and duration thanks to investment in the primary market. We used the rate sell-off to reduce our interest rate hedges and increase our modified duration over the month of October. We continued to opt for potential rising stars throughout most of the year, but, as this allocation is somewhat more exposed to the rise in interest rates, we hold a short position on Euro/US IG markets through total return swaps for hedging purposes. We aimed to manage this in a very tactical manner which is in line with our views on US and core Eurozone rates.

## Report of the Board of Directors

### **CANDRIAM BONDS Euro High Yield (Continued)**

We hold a constructive stance on European High Yield, where spreads remain relatively attractive in the current zero-rate environment. Over the medium term, we expect the asset class to be supported by solid fundamentals and dispersion to increase as governments and central banks remove their extraordinary support. In this scenario we expect that our highly selective approach, based on bottom-up bond selection combined with a rigorous assessment of the macroeconomic outlook and the high yield market context, will enable to fund to deliver superior risk-adjusted returns and out performance vs the index.

The Board of Directors of the funds notes the recent developments in the Ukraine and the sanctions being imposed on Russia by many countries as a result.

Given the limited exposure in the region, the Board of Directors' view is that those developments and sanctions are unlikely to have a significant direct adverse impact on the SICAV.

Nonetheless, since the situation continues to evolve, it remains difficult at this stage to estimate all indirect impacts which may arise from these emerging developments. The Management continues to monitor the developments closely and to take all the necessary actions.

The Board of Directors

Luxembourg, March 29, 2022.

## Audit report

To the Shareholders of  
**Candriam Bonds**

---

### Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Candriam Bonds (the "Fund") and of each of its sub-funds as at 31 December 2021, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### *What we have audited*

The Fund's financial statements comprise:

- the statement of net assets as at 31 December 2021;
- the investment portfolio as at 31 December 2021;
- the statement of changes in net assets for the year then ended; and
- the notes to the financial statements - Schedule of derivative instruments and the other notes to the financial statements, which include a summary of significant accounting policies.

---

### Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

---

### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

---

### **Responsibilities of the Board of Directors of the Fund for the financial statements**

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

---

### **Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative

## Other notes to the financial statements

### Note 1 - General Information

CANDRIAM BONDS (hereafter "the SICAV" or "the Fund"), is an investment company with variable capital in accordance with the part I of the law of December 17, 2010 concerning Undertakings for Collective Investment ("the Law"), as amended.

Its Articles of Incorporation were filed with the Register of Trade and Companies of Luxembourg at Luxembourg and were published in the "Mémorial, Recueil des Sociétés et Associations" dated August 24, 1989. They have been modified several times, in particular, for the last time on July 6, 2020. The corresponding modifications were published in the "Recueil Electronique des Sociétés et Associations" ("RESA").

The SICAV is entered in the Luxembourg Trade and Companies Registry under the number B-30659.

The SICAV capital is at all times equal to its total net assets and is represented by fully paid up and undesignated shares at par value.

The SICAV is a multiple sub-fund fund, meaning that it is composed of several sub-funds each of which represents a specific collection of assets and liabilities and corresponds to a separate investment policy.

The structure of multiple sub-funds offers investors not only the advantage of being able to choose between different sub-funds but also of being able to switch between these sub-funds. In each sub-fund, the SICAV may issue shares in different classes, which vary in particular by having different fees and commissions or in terms of their distribution policy. The shares are only available in registered form.

The following sub-funds are currently available to investors:

<b>Subfunds</b>	<b>Reference currency</b>
CANDRIAM BONDS Capital Securities	EUR
CANDRIAM BONDS Convertible Defensive	EUR

During the year, the Board of Directors has decided to proceed with the merger of the following sub-funds with effective date June 28, 2021:

- CANDRIAM BONDS Euro Corporate ex-Financials absorbed by Cleome Index Euro Corporate Bonds
- CANDRIAM BONDS Total Return Defensive absorbed by CANDRIAM BONDS Total Return.

In March 2021, the sub-fund CANDRIAM BONDS Euro High Yield reached the limits of its management capacity. As a result, in order to protect the interests of existing shareholders and to optimise sub-fund management, the Board of Directors of the SICAV decided to partially close the sub-fund to new investors, from March 31, 2021 to January 14, 2022. To allow existing shareholders to nevertheless continue to benefit from Sub-fund's performance, and to protect their interests, any new subscriptions has been limited to a maximum of 25% of the number of shares Existing Shareholders held as at 01.04.2021 before cut-off (date of the first net asset value applicable after the Partial Closure (the "Subscription Capacity") at the level of the concerned account in the Register.

Going forward, the sub-fund will automatically be partly closed again ("Partial Closure") in order to protect shareholders' interests, as soon as the Maximum Capacity has been reached (set at €3.2 Billion). In the event of such new partial closure, to allow existing shareholders to nevertheless continue to benefit from the sub-fund's performance, and to protect their interests, any new subscriptions will be limited to a maximum of 25% of the number of shares held on the date of the first net asset value applicable after the Partial Closure (the "Subscription Capacity").

The exact procedures concerning the Partial Closure defined by the Board of Directors are available on request from the Management Company free of charge.

The issued share classes are the following:

- The **BF class** is reserved for Belgian-law feeder UCIs approved by the Management Company and managed by an entity of the Candriam group.
- The **Classique (C class)** is available to individuals and legal entities.
- The **I class** is reserved exclusively for institutional investors.
- The **I2 class** is not subject to performance fees and is reserved exclusively for institutional investors.

# CANDRIAM BONDS

---

## Other notes to the financial statements

### Note 1 - General Information (Continued)

- The **LOCK class** (which may also be called "L class") is a share class which is associated with a mechanism that aims to limit the capital risk incurred. This mechanism is only offered by Belfius Banque S.A. (hereinafter "Belfius"), the sole authorised distributor of these shares. By investing in this class, investors accept that the shares are sold automatically when the net asset value reaches a set amount (activation price). Accordingly, whenever Belfius determines that the net asset value is equal to or less than the activation price, a redemption order is automatically generated and executed as soon as possible.  
The sales order will be consolidated at the first cut-off (deadline for the reception of orders) following the calculation date of the net asset value that gave rise to the automatic activation of the redemption order.
- The **N class** is reserved for distributors specially approved by the Management Company.
- The **R class** is reserved for financial intermediaries (including distributors and platforms) which:
  - have different arrangements with their clients for the provision of investment services in connection with the sub-fund, and
  - as a result of their applicable laws and regulations or on the basis of agreements with their customers, are not entitled to accept and keep duties, fees and other monetary benefits from the Management Company in connection with the provision of the above-mentioned investment services.
- The **R2 class** is restricted to:
  - distributors and/or intermediaries approved by the Management Company who will not receive any form of remuneration for investments in this class from an entity of the Candriam group, if the final investments in the shares are made in the context of a mandate.
  - UCIs approved by the Management Company.
- The **S class** is offered to institutional investors which have been individually approved by the Management Company, with a minimum initial subscription of EUR 25,000,000 (or, by decision of the Board of Directors, the equivalent amount in any other currency) or the equivalent amount in the relevant currency for classes denominated in other currencies. The Board of Directors may adjust this minimum at its discretion provided all shareholders are treated equally on a given valuation date.
- The **S2 class** is offered to institutional investors which have been individually approved by the Management Company, with a minimum initial subscription of EUR 100,000,000 (or, by decision of the Board of Directors, the equivalent amount in any other currency) or the equivalent amount in the relevant currency for classes denominated in other currencies. The Board of Directors may adjust this minimum at its discretion provided all shareholders are treated equally on a given valuation date.
- The **S3 class** is offered to institutional investors which have been individually approved by the Management Company, with a minimum initial subscription of EUR 175,000,000 (or, by decision of the Board of Directors, the equivalent amount in any other currency) or the equivalent amount in the relevant currency for classes denominated in other currencies. The Board of Directors may adjust this minimum at its discretion provided all shareholders are treated equally on a given valuation date.
- The **S4 class** is not subject to a performance fee and is reserved exclusively for institutional/professional investors, distributors and/or intermediaries who are approved by the Management Company, who invest through Spezialfonds and whose minimum initial subscription is EUR 75,000,000 or its equivalent in foreign currencies for those classes denominated in foreign currencies (this minimum amount may be changed at the discretion of the Board of Directors provided that equal treatment of shareholders is ensured for a given valuation date).
- The **V class** is reserved solely for institutional investors with a minimum initial subscription of EUR 20,000,000 (or, by decision of the Board of Directors, the equivalent amount in any other currency) or the equivalent amount in the relevant currency for classes denominated in other currencies.  
The Board of Directors may adjust this minimum at its discretion provided all shareholders are treated equally on a given valuation date.
- The **V2 class** is a share class with no performance fee and is restricted to institutional/professional investors, distributors and/or intermediaries approved by the Management Company, and whose initial minimum subscription is EUR 20,000,000 or the equivalent in foreign currencies for the classes denominated in foreign currencies (this amount can be reviewed at the directors' discretion; in this case, equal treatment of shareholders must be ensured on the same valuation day).
- The **Z class** is reserved:
  - for institutional/professional investors approved by the Management Company. Since the portfolio management activity for this class is remunerated directly via the contract concluded with the investor, no portfolio management fee will be charged on the assets of this class.
  - for UCIs approved by the Management Company and managed by an entity of the Candriam Group.

The share in annual profit of holders of capitalisation shares is capitalized whereas distribution shares entitle their holders to receive a share in annual profit in the form of a cash dividend.

- Hedging against fluctuations in the reference currency: the aim of such hedging is to attenuate the effect of exchange-rate fluctuations between the reference currency of the sub-fund and the currency in which the share class is denominated. The aim of this type of hedging is to attain a performance (adjusted in particular for the interest-rate differential between the two currencies) that is reasonably comparable between the hedged class and the (equivalent) class denominated in the reference currency of the sub-fund. This type of hedging will be identified by the addition of the suffix H in the name of the class.
- Hedging against the exchange-rate exposure of the assets that make up the portfolio: the aim of such hedging is to attenuate the effect of exchange rate fluctuations between the currencies in which the sub-fund's assets are held and the currency in which the share class is denominated. This type of hedging will be identified by the addition of the suffix AH in the name of the class.

The shares issued are described in detail in the section "Statistics" of the various sub-funds.

---

## Other notes to the financial statements

### Note 2 - Principal accounting policies

The financial statements of the SICAV are prepared in accordance with Luxembourg regulations relating to Undertakings for Collective Investment. Some small discrepancies might appear in some totals or sub-totals in the financial statements due to rounding rules.

The net asset values used for the purpose of the financial statements are dated December 31, 2021.

Sub-fund CANDRIAM BONDS Euro Corporate ex-Financials and CANDRIAM BONDS Total Return Defensive: the net asset values have been calculated on June 29, 2021 on the basis of the last known prices at the time of the valuation;

The net asset values of other sub-funds have been calculated on January 3, 2022 on the basis of the last known prices at the time of the valuation.

#### a) Valuation of each sub-fund's portfolio

The valuation of any security admitted for trading to an official listing or any other normally operating regulated market which is recognised and open to the public is based on the last price known in Luxembourg on the valuation date or, if this stock is traded on several markets, on the last known price on the principal market on which it is traded. If the last known price is not representative, the valuation shall be based on the probable realisation value as estimated by the Board of Directors with prudence and good faith. Securities which are neither quoted nor traded on a stock market or any other normally operating regulated market which is recognised and open to the public shall be valued on the basis of the probable realisation value as estimated with due prudence and good faith. All other assets shall be valued by the directors on the basis of the probable realisation value which must be estimated in good faith and according to generally accepted principles and procedures.

#### b) Net realised profits or losses on sales of investments

The realised profits or losses realised on sales of investments from each sub-fund are calculated based on the average cost of the investments sold.

#### c) Foreign currency translation

The values expressed in a currency other than the reference currency of each sub-fund are translated into that currency at the exchange rate prevailing at closing date.

Income and expenses in a currency other than the reference currency of each sub-fund are translated into that currency at the exchange rates prevailing at the transaction date.

The acquisition cost of securities in each sub-fund expressed in a currency other than the reference currency of the sub-fund is translated into that currency at the exchange rates prevailing at the day of purchase.

Exchange rates used as at December 31, 2021:

1 EUR =	116.781001 ARS	1 EUR =	24.850000 CZK	1 EUR =	4.737600 MYR	1 EUR =	10.296000 SEK
1 EUR =	1.564150 AUD	1 EUR =	7.437600 DKK	1 EUR =	10.028150 NOK	1 EUR =	1.533100 SGD
1 EUR =	6.334200 BRL	1 EUR =	0.839600 GBP	1 EUR =	1.661000 NZD	1 EUR =	37.988150 THB
1 EUR =	1.436500 CAD	1 EUR =	8.865950 HKD	1 EUR =	4.538250 PEN	1 EUR =	15.101750 TRY
1 EUR =	1.036150 CHF	1 EUR =	368.565000 HUF	1 EUR =	4.583350 PLN	1 EUR =	31.025650 UAH
2 EUR =	968.894499 CLP	1 EUR =	16207.943250 IDR	1 EUR =	4.948750 RON	1 EUR =	1.137200 USD
3 EUR =	7.231500 CNH	1 EUR =	130.954250 JPY	1 EUR =	85.297100 RUB	1 EUR =	18.149750 ZAR
4 EUR =	4628.404861 COP	1 EUR =	23.272800 MXN				

#### d) Combined financial statements of the SICAV

The combined statement of the SICAV's net assets and the combined statement of changes in net assets which are expressed in EUR are the sum of the statement of net assets, the statement of changes in net assets of each sub-fund converted into the currency of the SICAV using exchange rates prevailing at the closing date.

The investments made by certain sub-funds of the SICAV in other sub-funds of the SICAV have not been eliminated from the combined statement of net assets as of December 31, 2021. As of December 31, 2021, the total of intra-SICAV investments amounted to EUR 110,464,647. Therefore, the combined net assets at the closing date would amount to EUR 13,119,432,390 if these intra-SICAV investments were eliminated.

### Note 2 - Principal accounting policies (Continued)

Sub-funds	Intra-SICAV Investments	Amount (in EUR)
CANDRIAM BONDS Total Return	CANDRIAM BONDS EMERGING MARKETS CORPORATE I - Hedged EUR C	2,275,752 110,464,647

#### e) Valuation of options and futures

The valuation of options and futures admitted to an official listing or any other organised market is based on the last known price or, if the option is traded on more than one market, on the basis of the last known price in the market on which the contract was concluded by the SICAV. Options and futures that are not traded on a stock exchange or any other organised market will be valued at their probable market value estimated conservatively and in good faith. The market value of options is included in the statement of net assets under the heading "options (long position) / (short position) at market value".

The realised gains / (losses) and change in unrealised appreciation / depreciation on options are disclosed in the statement of changes in net assets respectively under the headings "Net realised gain / (loss) on options" and "Change in net unrealised appreciation / depreciation on options". The unrealised appreciation / (depreciation) on future contracts is disclosed in the statement of net assets under "Net unrealised appreciation / (depreciation) on futures". Changes in the market value of open future contracts are recorded as unrealised appreciation / (depreciation) in the statement of changes in net assets under "Change in net unrealised appreciation / depreciation on futures". Realised gains or losses, representing the difference between the value of the contract at the time it was opened and the value at the time it was closed, are reported at the closing or expiration of futures contracts in the statement of changes in net assets under "Net realised gain / (loss) on futures".

For the details of outstanding options or financial futures, if any, please refer to the section "Notes to the financial statements - Schedule of derivative instruments".

#### f) Valuation of forward foreign exchange contracts

The forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the closing date and applicable to the remaining period until the expiration date. The unrealised appreciation / (depreciation) on forward foreign exchange contracts is disclosed in the statement of net assets under "Net unrealised appreciation / (depreciation) on forward foreign exchange contracts".

Realised gains / (losses) and change in unrealised appreciation / depreciation resulting there from are included in the statement of changes in net assets respectively under "Net realised gain / (loss) on forward foreign exchanges contracts" and "Change in net unrealised appreciation / depreciation on forward foreign exchange contracts".

For the details of outstanding forward foreign exchange contracts, if any, please refer to the section "Notes to the financial statements - Schedule of derivative instruments".

#### g) Valuation of Non-Deliverable Forwards contracts ("NDF")

Non-Deliverable Forwards are short-term forward contracts on thinly traded or non-convertible foreign currencies. Those contracts are valued on the basis of forward exchange rates prevailing at the closing date and applicable to the remaining period until the expiration date. The unrealised profits or losses resulting from NDF are included in the statement of net assets under the heading "Net unrealised appreciation / (depreciation) on forward foreign exchange contracts".

The NDF are normally quoted and settled in USD. Realised gains / (losses) and change in unrealised appreciation / depreciation resulting there from are included in the statement of changes in net assets respectively under "Net realised gain / (loss) on forward foreign exchanges contracts" and "Change in net unrealised appreciation / depreciation on forward foreign exchange contracts".

For the details of outstanding Non-Deliverable Forwards, if any, please refer to the section "Notes to the financial statements - Schedule of derivative instruments".

#### h) Valuation of Contracts for difference ("CFD")

Contracts for difference are valued at fair value based respectively on the last known spread curve, rates curve and last known closing price of the underlying asset.

The unrealised appreciation / (depreciation) on CFD is disclosed in the statement of net assets under "Net unrealised appreciation / (depreciation) on CFD". Realised gains / (losses) and change in unrealised appreciation / depreciation resulting there from are included in the statement of changes in net assets respectively under "Net realised gain / (loss) on CFD" and "Change in net unrealised appreciation / depreciation on CFD".

For the details of outstanding CFD contracts, if any, please refer to the section "Notes to the report - Schedule of derivative instruments".

#### i) Valuation of Credit Default Swaps contracts ("CDS")

The value of a credit default swap is determined by a comparison between the discounted future flows on the value of the annual premium paid by the protection buyer, and the current value of the expected losses on the reference asset if credit events specified in the swap contract should occur. The unrealised profits or losses resulting from credit default swaps are included in the statement of net assets under the heading "Net unrealised appreciation / (depreciation) on swaps".

Realised profits / (losses) and change in unrealised appreciation / depreciation resulting there from are included in the statement of changes in net assets respectively under "Net realised gain / (loss) on swaps" and "Change in net unrealised appreciation / depreciation on swaps".

# CANDRIAM BONDS

---

## Other notes to the financial statements

### Note 2 - Principal accounting policies (Continued)

For the details of outstanding credit default swaps, if any, please refer to the section "Notes to the financial statements - Schedule of derivative instruments".

#### j) Valuation of Total Return Swaps contracts ("TRS")

Total-return swaps are valued by reference to the mark to market value based on the market value of the underlying asset. The unrealised profits or losses resulting from total-return swaps are included in the statement of net assets under the heading "Net unrealised appreciation / (depreciation) on swaps".

Realised profits / (losses) and change in unrealised appreciation / depreciation resulting there from are included in the statement of changes in net assets respectively under "Net realised gain / (loss) on swaps" and "Change in net unrealised appreciation / depreciation on swaps".

For the details of outstanding total return swaps, if any, please refer to the section "Notes to the financial statements – Schedule of derivative instruments".

#### k) Valuation of Interest Rate Swaps contracts ("IRS")

Interest-rate swaps are valued at their fair value. The unrealized profits or losses resulting from interest-rate swaps are included in the statement of net assets under the heading "Net unrealized appreciation / (depreciation) on swaps".

Realised profits / (losses) and change in unrealised appreciation / depreciation resulting there from are included in the statement of changes in net assets respectively under "Net realised gain / (loss) on swaps" and "Change in net unrealised appreciation / depreciation on swaps".

For the details of outstanding Interest rate swaps, if any, please refer to the section "Notes to the financial statements - Schedule of derivative instruments".

#### l) Repurchase agreements

A reverse repurchase agreement is an agreement by which, in exchange for an amount of cash, the SICAV receives (purchases) transferable securities from a counterparty which agrees to repurchase them at a price and a term specified between the two parties when the agreement is concluded. A reverse repurchase agreement is similar in its effects to a loan granted by the SICAV to the counterparty, the loan being secured by transferable securities.

The SICAV accounts for reverse repurchase agreements as if it were a loan and shows them in the Statement of net assets under the heading "Receivable on reverse repurchase agreements / Payable on reverse repurchase agreements". Any interest receivable/payable (in the event of a negative interest rate) on this transaction is accounted for under other assets/other liabilities in the Statement of net assets. A reverse repurchase agreement is generally only of short duration and is not transferable. The SICAV values this type of agreement at cost, which, when combined with accrued interest, provides an approximation of the value at which the securities will be repurchased by the counterparty. The interest received or paid (in the event of negative interest rates) is recorded in the Statement of changes in net assets under the heading "Interest on reverse repurchase agreements".

#### m) Transaction costs

For the year ended December 31, 2021, the SICAV incurred transaction costs and broker's charges related to the purchase and sale of transferable securities, money market instruments, other eligible assets and derivatives instruments. Those charges are disclosed in the statement of changes in net assets under the heading "Transaction costs".

Furthermore, in accordance with the practices of the bond markets, a bid-offer spread is applied to securities purchase or sale transactions. According to this principle, the selling and buying prices applied by the broker to a given transaction are not identical and the difference between them constitutes the broker's remuneration.

#### n) Income

Interest income is accrued pursuant to the terms of the underlying investment. Income is recorded net of respective withholding taxes, if any. Dividends are recognised on ex-date.

#### o) Abbreviations used in investment portfolios

## Other notes to the financial statements

### Note 3 - Management fees

Candriam Luxembourg, a partnership limited by shares under Luxembourg law whose registered office is located at SERENITY - Bloc B, 19-21, Route d'Arlon, L-8009 Strassen, has been appointed Management Company. An agreement to that effect was entered into for an unlimited term. Either party is entitled to terminate the agreement at any time by registered letter (with signed receipt requested) sent to the other party, subject to 90 days' notice.

Candriam Luxembourg is a subsidiary of Candriam Group, an entity of the New York Life Insurance Company group.

It is authorised as a Management Company of Chapter 15 of the Law of 2010 concerning UCIs as amended, and is authorised to exercise the activities of collective portfolio management, investment portfolio management and investment consultant.

By virtue of a delegation contract, the Management Company has delegated portfolio management for certain SICAV sub-funds, under its supervision, responsibility and at its own expense, to its Belgian subsidiary Candriam Belgium, which registered office is 58, Avenue des Arts, B-1000 Brussels. This agreement may be terminated by either party subject to advance written notice of 90 days.

The portfolio management of the following sub-funds is thus delegated to Candriam Belgium: CANDRIAM BONDS Capital Securities, CANDRIAM BONDS Euro, CANDRIAM BONDS Euro Corporate, CANDRIAM BONDS Euro Corporate ex-Financials, CANDRIAM BONDS Euro Diversified, CANDRIAM BONDS Euro Government, CANDRIAM BONDS Euro Long Term, CANDRIAM BONDS Euro Short Term, CANDRIAM BONDS Floating Rate Notes, CANDRIAM BONDS Global Government, CANDRIAM BONDS Global Inflation Short Duration, CANDRIAM BONDS International, CANDRIAM BONDS Total Return Defensive.

By virtue of a delegation contract, the Management Company has delegated portfolio management for certain other SICAV sub-funds, under its supervision, responsibility and at its own expense, to its French subsidiary Candriam France, a simplified joint-stock company, which registered office is 40, rue Washington, F-75408 Paris Cedex 08. This agreement may be terminated by either party subject to advance written notice of 90 days.

Candriam France, a simplified joint-stock company, is a portfolio Management Company established in France in 1988 for a limited duration.

The portfolio management of the following sub-funds is thus delegated to Candriam France: CANDRIAM BONDS Convertible Defensive, CANDRIAM BONDS Credit Opportunities, CANDRIAM BONDS Euro High Yield and CANDRIAM BONDS Global High Yield.

The Management Company has partly delegated the implementation of the portfolio management function of the sub-funds CANDRIAM BONDS Emerging Debt Local Currencies, CANDRIAM BONDS Emerging Markets, CANDRIAM BONDS Emerging Markets Corporate, CANDRIAM BONDS Emerging Markets Total Return and CANDRIAM BONDS Total Return to Candriam Belgium and has entrusted another part to its British branch, UK establishment, 200 Aldersgate, Aldersgate Street, London EC1A4HD, United Kingdom.

The rates applicable as at December 31, 2021 are as follows:

<b>Sub-funds</b>	<b>Share class</b>	<b>Share type</b>	<b>ISIN</b>	<b>Management fee</b>

### Note 4 - Operating and Administrative Expenses

The SICAV bears the current operating and administrative expenses incurred to cover all the overheads and variable expenses, the charges, fees and other expenses, as defined below ("Operating and Administrative Expenses").

The Operating and Administrative Expenses cover, but are not limited to, the following expenses:

- a) the expenditures incurred directly by the SICAV, including, inter alia, the Depositary Bank's fees and charges, the fees and expenses of the approved independent auditors, the cost of share class hedging, including that invoiced by the Management Company, the fees paid to the Directors and the reasonable expenses and outlays incurred by or for the Directors;
- b) a "service fee" paid to the Management Company and including the remaining sum of the Operating and Administrative Expenses after deduction of the expenses detailed in section (a) above, that is, inter alia, the fees and expenses of the Domiciliary Agent, the Administrative Agent, the Transfer Agent and Registrar Holding and the Principal Paying Agent, the costs related to registration and maintenance of the registration in all the jurisdictions (such as the fees charged by the supervisory authorities concerned, the translation expenses and the remuneration of the Representatives abroad and the local paying agents), the stock exchange registration and renewal expenses, the cost of publishing the share prices, the postal and telecommunication charges, preparation cost, printing, translating and distributing the prospectuses, key investor information documents, notices to shareholders, financial reports or of any other document intended for the shareholders, the legal fees and expenses, the charges and expenses related to the taking out of any subscription/licence or any other use of fee-paying information or data, the expenses incurred by the use of a registered trademark by the SICAV, the expenses and fees payable to the Management Company and/or its delegates and/or to any other agent appointed by the SICAV itself and/or to the independent experts, excluding Management fees.

The Operating and Administrative Expenses are expressed as an annual percentage of the average net asset value of each share class and are payable monthly.

At the end of a given period, if the actual charges and expenses were to be higher than the percentage of Operating and Administrative Expenses set for a share class, then the Management Company would pay for the difference itself. Conversely, if the actual charges and expenses were to turn out to be lower than the percentage of Operating and Administrative Expenses set for a share class, then the Management Company would retain the difference.

The Management Company shall be entitled to instruct the SICAV to proceed to settle all or part of the expenses as listed above directly from its assets.

In such a case, the amount of the Operating and Administrative Expenses would be reduced accordingly.

The maximum rates applicable as at December 31, 2021 are as follows:

### Note 5 - Performance fees

In payment for its portfolio management activity, the Management Company also receives performance fees on certain share classes of certain subfunds.

The method of calculating the performance commission is detailed in the various technical specifications attached to the Prospectus of the SICAV in force.

The reference period is the financial year and these commissions are payable at the end of the calendar year.

Until 2021, Two thirds of the performance fees will be carried over to the following financial year and will be either reduced by way of a provision reversal resulting from an under-performance (within the limit of the provision formed), or increased by any new provision for an outperformance fee.

# CANDRIAM BONDS

## Other notes to the financial statements

### Note 5 - Performance fees (Continued)

Each time the class is valued, a reference asset is determined by assuming a theoretical investment corresponding to the performance of the index of all the subscriptions received during the period (book net assets at the end of the previous financial year are treated as a subscription at the beginning of the period).

In the event of redemption, the last reference asset calculated and the previous-day total of all the subscriptions received are reduced in advance proportional to the number of redeemed units. Similarly, a share of the possible provision for the performance fee on outstanding credits recorded in the accounts at the last valuation is, in proportion to the number of redeemed units, allocated definitively to a specific personal account. This share of the performance fee is retained by the Management Company as from the date of redemption.

In the event that performance fees are not paid to the Management Company, these amounts are written back under the heading "Other income".

## Other notes to the financial statements

### Note 6 - Subscription tax

The SICAV is governed by the Luxembourg tax laws.

By virtue of the legislation and regulations currently in force, the SICAV is subject in Luxembourg to an annual tax of 0.05% of the net asset value of the SICAV; this rate is reduced to 0.01% for the classes reserved for institutional investors. This tax is payable quarterly on the basis of the net asset value of the SICAV calculated at the end of the quarter to which the tax relates.

The Belgian government enacted a law to tax once a year the net asset value of foreign investment funds registered in Belgium. This annual tax is calculated on the net amounts defined as invested in Belgium by Belgian financial intermediaries. In the absence of a sufficient declaration relating to these figures, the tax authority will be entitled to calculate the tax on the entirety of the assets of these sub-funds. The Belgian law of June 17, 2013 comprising fiscal and financial provisions and provisions relating to sustainable development set the rate of the annual tax for Undertakings for Collective Investment at 0.0925% with effect from January 1, 2014.

As a precautionary measure, the SICAV filed a claim with the Belgian tax authority and the Brussels Court of First Instance for the tax to be refunded. At this stage, it is not possible to prejudge the outcome of the dispute or any reimbursement in favour of the SICAV. In a similar case, the Belgian State appealed to the Court of Cassation against the Court of Appeal's rulings in favour of the plaintiff. The management company was just informed that the Court of Cassation ruled out against the plaintiff on March 25, 2022 rendering more hypothetical a positive outcome of the dispute in favour of the SICAV.

### Note 7 - Securities lending

By a delegation contract February 18, 2014, the Management Company delegated the implementation of the securities lending and borrowing transactions, under its supervision and responsibility, to Candriam France, a simplified joint-stock company, whose registered office is at 40, rue Washington, F-75408 Paris Cedex 08. This contract may be terminated by either party giving 90 days' notice in writing.

As at December 31, 2021, the composition of the securities lent was as follows:

Sub-funds	Currency	Market value of securities lent	Collateral Securities
CANDRIAM BONDS Capital Securities	EUR	1,307,749	1,339,086
CANDRIAM BONDS Convertible Defensive	EUR	40,051,793	60,373,510
CANDRIAM BONDS Euro Long Term	EUR	28,337,278	29,659,451
CANDRIAM BONDS Global Government	EUR	23,749,101	24,318,197
CANDRIAM BONDS Euro	EUR	143,420,574	159,783,575
CANDRIAM BONDS Euro Corporate	EUR	52,567,066	53,919,075
CANDRIAM BONDS Euro Diversified	EUR	128,787,061	168,146,633
CANDRIAM BONDS Euro Government	EUR	420,343,341	435,632,449
CANDRIAM BONDS Euro Short Term	EUR	196,941,544	203,225,734
CANDRIAM BONDS Floating Rate Notes	EUR	10,738,307	11,796,347
CANDRIAM BONDS Global Inflation Short Duration	EUR	97,806,770	101,319,810
CANDRIAM BONDS International	EUR	6,666,381	7,645,169
CANDRIAM BONDS Total Return	EUR	138,154,806	147,506,323

The types of financial guarantees permitted are as follows:

- cash denominated in the reference currency of the sub-fund concerned;
- good-quality debt securities (rated at least BBB-/Baa3 or equivalent by one of the rating agencies) issued by a public-sector issuer of an OECD country (states, supranationals, etc.) and whose issue size is a minimum of EUR 250 million;
- good-quality debt securities (rated at least BBB-/Baa3 or equivalent by one of the rating agencies) issued by a private-sector issuer of an OECD country and whose issue size is a minimum of EUR 250 million;
- shares listed or traded on a regulated market of a Member State of the European Union or on a securities exchange of a State belonging to the OECD, provided that these shares are included in a major index;
- shares or units of undertakings for collective investment offering adequate liquidity and investing in money market instruments, good-quality bonds or in shares that meet the conditions listed above.

The securities lent are valued on the basis of the last-known price. The securities and the related interest receivable are shown in the Statement of net assets.

The amounts of the interest received in connection with this securities lending are included in the item "Interest on securities lending" of the statement of changes in net assets.

The counterparties related to the open positions of securities lending are BNP Paribas Securities Services SCA, BNP Paribas, Natixis SA, Société Générale SA, BofA Securities, Banco Santander, Goldman Sachs, Crédit agricole Corporate and Investment Bank, Unicredit AG, HSBC, and Mizuho.

The following items of income were recorded in the accounts during the year ended December 31, 2021:

# CANDRIAM BONDS

### Note 10 - Swing Pricing

For all the sub-funds of the SICAV, provision has been made for the following measure:

On the valuation days on which the difference between the amount of subscriptions and the amount of redemptions in a sub-fund (that is, the net transactions) exceeds a threshold previously set by the Board of Directors (partial Swing Pricing), the Board reserves the right:

- to determine the net asset value by adding to the assets (for net subscriptions) or deducting from the assets (for net redemptions) a certain percentage of fees and costs corresponding to market practices in buying or selling securities for CANDRIAM BONDS Credit Alpha, CANDRIAM BONDS Credit Opportunities, CANDRIAM BONDS Global High Yield and CANDRIAM BONDS Euro High yield;
- to value the securities portfolio of the sub-fund on the basis of buying or selling prices or by setting spreads at a level representative of the market in question (in the case, respectively, of net inflow or net outflow) for CANDRIAM BONDS Capital Securities, CANDRIAM BONDS Convertible Defensive, CANDRIAM BONDS Emerging Debt Local Currencies, CANDRIAM BONDS Emerging Markets, CANDRIAM BONDS Emerging Markets Total Return, CANDRIAM BONDS Euro, CANDRIAM BONDS Euro Corporate, CANDRIAM BONDS Euro Corporate Ex-Financials, CANDRIAM BONDS Euro Diversified, CANDRIAM BONDS Euro Government, CANDRIAM BONDS Euro Long Term, CANDRIAM BONDS Euro Short Term, CANDRIAM BONDS Floating Rate Notes, CANDRIAM BONDS Global Government, CANDRIAM BONDS Global Inflation Short Duration, CANDRIAM BONDS International, CANDRIAM BONDS Total Return, CANDRIAM BONDS Total Return Defensive and CANDRIAM BONDS Emerging Markets Corporate.

As at December 31, 2021, no swing was applied.

The swing factor is the amount by which the NAV is swung when the swing pricing process is triggered after net subscriptions or redemptions exceed the swing threshold.

The factors to consider when setting the swinging factor include:

For high yield method:

- Bid-ask spread

For fixed income method:

- Swing Pricing Policy
- linked to Bid/Ask spread

Sub-funds	Maximum swing factor Inflow rate (in %)	Maximum swing factor Outflow rate (in %)
CANDRIAM BONDS Credit Alpha	0.25	0.25
CANDRIAM BONDS Credit Opportunities	0.34	0.34
CANDRIAM BONDS Euro High Yield	0.33	0.33
CANDRIAM BONDS Global High Yield	0.36	0.36

### Note 11 - Cash at bank and broker

The Cash at bank and broker in the statement of net assets comprises the cash accounts and the cash at broker accounts on future contracts and listed options with J.P. Morgan AG.

The part relating to the cash at broker accounts in Cash at bank and broker included in the statement of net assets as at December 31, 2021 is as follows:

Sub-funds	Currency	Cash at broker
CANDRIAM BONDS Capital Securities	EUR	7,893
CANDRIAM BONDS Convertible Defensive	EUR	280,770
CANDRIAM BONDS Credit Alpha	EUR	106,060
CANDRIAM BONDS Credit Opportunities	EUR	(924,106)
CANDRIAM BONDS Emerging Debt Local Currencies	USD	149,031

### Global Risk Exposure

#### Risk management – calculation of aggregate risk

For all the sub-funds except CANDRIAM BONDS Capital Securities, CANDRIAM BONDS Credit Alpha, CANDRIAM BONDS Credit Opportunities (see note 1), CANDRIAM BONDS Emerging Debt Local Currency, CANDRIAM BONDS Emerging Markets Total Return, CANDRIAM BONDS Global Inflation Short Duration and CANDRIAM BONDS Total Return the SICAV uses the commitment approach in accordance with CSSF circular 11/512.

The method used to determine the below sub-funds' aggregate risk is the Relative VaR (Value at Risk) method:

- CANDRIAM BONDS Capital Securities: the benchmark for Relative VaR is a mixed indicator composed of the ICE BofA Contingent Capital Index Hedged EUR (Total Return) (30%) and the ICE BofA Euro Financial Subordinated & Lower Tier-2 Index (Total Return) (70%). As an indication, the leverage of this sub-fund is a maximum of 350% of net assets. The sub-fund could, however, be exposed temporarily to a higher leverage.
- CANDRIAM BONDS Emerging Debt Local Currencies: the J.P. Morgan GBI-EM Global Diversified (Total Return) index is used as the benchmark for the Relative VaR. As an indication, the leverage of this sub-fund should vary between 50% and 150% of net assets.
- CANDRIAM BONDS Global Inflation Short Duration: the Bloomberg Barclays World Govt Inflation-Linked 1-5Yrs Index Hedged EUR index is used as the benchmark for the Relative VaR. As an indication, the leverage of this sub-fund is a maximum of 350% of net assets. The sub-fund could, however, be exposed temporarily to a higher leverage.

The UCITS uses the absolute "Value at Risk" (VaR) approach, the historical method of calculating the aggregate risk of the sub-funds CANDRIAM BONDS Convertible Opportunities, CANDRIAM BONDS Credit Opportunities (see note1), CANDRIAM BONDS Emerging Markets Total Return and CANDRIAM BONDS Total Return.

This approach measures the maximum potential loss for a given confidence threshold (probability) over a specific time period under normal market conditions. These calculations are performed on the basis of the following parameters: a confidence interval of 99%, a holding period of one day (converted into a holding period of 20 days) and a data history of three years.

The global exposure is calculated according to the relative VaR approach.

The results of the calculation of the relative VaR for the exercise from January 1, 2021 to December 31, 2021 are:

Sub-funds	Value at risk 99% (20D)		
	Var Min	Var Max	Average Var
CANDRIAM BONDS Capital Securities	1.01%	1.98%	1.21%
CANDRIAM BONDS Credit Alpha	1.05%	4.78%	2.54%
CANDRIAM BONDS Credit Opportunities	3.34%	5.52%	4.21%
CANDRIAM BONDS Emerging Debt Local Currencies	1.06%	1.70%	1.28%
CANDRIAM BONDS Emerging Markets Total Return	3.14%	5.21%	4.14%
CANDRIAM BONDS Global Inflation Short Duration	0.93%	1.32%	1.12%
CANDRIAM BONDS Total Return	1.74%	3.16%	2.34%

The expected leverage of this sub-fund will be a maximum of 350%. This leverage is calculated for each derivative product on the basis of the commitment method and is added to the securities portfolio of the sub-fund. The sub-fund may nevertheless be exposed to higher leverages.

The levels of leverage for the year from January 1, 2021 to December 31, 2021 are:

Sub-funds	Average leverage
CANDRIAM BONDS Capital Securities	70.62%
CANDRIAM BONDS Credit Alpha	86.99%
CANDRIAM BONDS Credit Opportunities	91.19%
CANDRIAM BONDS Emerging Debt Local Currencies	116.37%
CANDRIAM BONDS Emerging Markets Total Return	117.10%
CANDRIAM BONDS Global Inflation Short Duration	116.00%
CANDRIAM BONDS Total Return	219.89%

### Engagement & voting policies, use of voting rights

The Management company does not exercise voting rights for the considered funds.

For all engagement matters, we refer to the engagement policy and to the associated reports, all available on Candriam website [www.candriam.co/en/professional/market-insights/sri-publications](http://www.candriam.co/en/professional/market-insights/sri-publications).

### Information concerning the remuneration policy

European Directive 2014/91/EU amending Directive 2009/65/EC on undertakings for collective investment in transferable securities, which is applicable to the SICAV, came into force on 18 March 2016. It is implemented in national law under the Luxembourg Act of 10 May 2016 implementing Directive 2014/91/EU. Due to these new regulations, the SICAV is required to publish information relating to the remuneration of identified employees within the meaning of the Act in the annual report.

Candriam Luxembourg holds a double licence, first, as a management company in accordance with section 15 of the Law of December 17, 2010 on undertakings for collective investment and, second, as a manager of alternative investment funds in accordance with the Law of July 12, 2013 relating to alternative investment fund managers. The responsibilities incumbent on Candriam Luxembourg under these two laws are relatively similar and Candriam Luxembourg considers that its personnel is remunerated in the same manner for tasks relating to administration of UCITS and of alternative investment funds.

During its financial year ended on December 31, 2021, Candriam Luxembourg paid the following amounts to its personnel:

- Total gross amount of fixed remunerations paid (excluding payments or benefits that can be considered to be part of a general and non-discretionary policy and to have no incentive effect on risk management): EUR 14,364,579.
- Total gross amount of variable remunerations paid: EUR 4,998,163.
- Number of beneficiaries: 132.

Aggregate amount of remunerations, broken down between senior management and the members of the personnel of the investment manager whose activities have a significant impact on the fund's risk profile. The systems of Candriam Luxembourg do not permit such an identification for each fund under management. The numbers below also show the aggregate amount of overall remunerations at Candriam Luxembourg.

- Aggregate amount of the remunerations of the senior management: EUR 3,840,050.
- Aggregate amount of the remunerations of the members of the personnel of Candriam Luxembourg whose activities have a significant impact on the risk profile of the funds of which it is the management company (excluding senior management): EUR 1,816,006.

The remuneration policy was last reviewed by the remuneration committee of Candriam Luxembourg on January 29, 2021 and was adopted by the Board of Directors of Candriam Luxembourg.

Remunerations paid by Candriam Belgium, acting as sub-investment manager, to its personnel during the financial year ended on December 31, 2021:

- Total gross amount of fixed remunerations paid (excluding payments or benefits that can be considered to be part of a general and non-discretionary policy and to have no incentive effect on risk management): EUR 24,608,259.
- Total gross amount of variable remunerations paid: EUR 9,271,300.
- Number of beneficiaries: 277.

Aggregate amount of remunerations, broken down between senior management and the members of the personnel of the subinvestment manager whose activities have a significant impact on the fund's risk profile. The systems of the sub-investment manager do not permit such an identification for each fund under management. The numbers below also show the aggregate amount of overall remunerations at the level of the sub-investment manager.

- Aggregate amount of the remunerations of the senior management: EUR: 5,517,342.
- Aggregate amount of the remunerations of the members of the personnel of the sub-investment manager whose activities have a significant impact on the risk profile of the funds of which it is the sub-investment manager (excluding senior management): EUR 5,467,138.

Remunerations paid by Candriam France, acting as sub-investment manager(s), to its personnel during the financial year ended on December 31, 2021:

- Total gross amount of fixed remunerations paid (excluding payments or benefits that can be considered to be part of a general and non-discretionary policy and to have no incentive effect on risk management): EUR 16,018,538.
- Total gross amount of variable remunerations paid: EUR 8,444,050.
- Number of beneficiaries: 182.

Aggregate amount of remunerations, broken down between senior management and the members of the personnel of the sub-investment manager whose activities have a significant impact on the fund's risk profile. The systems of the sub-investment manager do not permit such an identification for each fund under management. The numbers below also show the aggregate amount of overall remunerations at the level of the sub-investment manager.

- Aggregate amount of the remunerations of the senior management: EUR 3,491,605.
- Aggregate amount of the remunerations of the members of the personnel of the sub-investment manager whose activities have a significant impact on the risk profile of the funds of which it is the sub-investment manager (excluding senior management): EUR 2,680,293.

### Sustainable Finance Disclosure Regulation (SFDR)

**CANDRIAM BONDS Capital Securities, CANDRIAM BONDS Credit Alpha, CANDRIAM BONDS Credit Opportunities, CANDRIAM BONDS Emerging Markets Corporate, CANDRIAM BONDS Emerging Markets Total Return, CANDRIAM BONDS Euro High Yield and CANDRIAM BONDS Global High Yield**

The above-mentioned sub-funds are classified as article 6 under SFDR.

They do not integrate systematically ESG characteristics in the management framework. Nevertheless, sustainability risks are taken into account in investment decisions by Candriam exclusion Policy which exclude some controversial activities.

### CANDRIAM BONDS Convertible Defensive

CANDRIAM BONDS Convertible Defensive is classified as article 8 under SFDR. The fund aims to promote environmental and social characteristics but does not have a sustainable investment objective.

The fund's investment decisions take into account environmental, social and governance (ESG) criteria. These criteria are integrated in the management framework defined for the fund and can weight on investment decisions and position sizing.

In order to take into account these ESG criteria and mitigate sustainability risks, the fund aims to exclude issuers that have significantly and repeatedly violated one of the principles of the United Nations Global Compact or are significantly exposed to certain controversial activities. These exclusions have for instance led the fund to avoid any investment in companies such as Philip Morris International, involved in tobacco production, or Lafarge, active in thermal coal production.

In order to translate the promotion of environmental and social characteristics, governance and climate change along with social awareness are central to our ESG Integration approach applied across the fund's investment. Over the past year, the subfund initiated / reinforced positions in issuers with a positive ESG profile, based on Candriam's independent ESG rating assessment.

To give expression to the fact that challenges relating to climate change have been taken into account, the carbon footprint of companies is measured. At the end of the year 2021, the fund's carbon footprint was 102.66 tCO<sub>2</sub>-eq / million euro invested.

### CANDRIAM BONDS Emerging Debt Local Currencies

CANDRIAM BONDS Emerging Debt Local Currencies is classified as article 8 under SFDR. The fund aims to promote environmental and social characteristics but does not have a sustainable investment objective.

The fund's investment decisions take into account environmental, social and governance (ESG) criteria. These criteria are integrated in the management framework defined for the fund and can weight on investment decisions and position sizing. In order to take into account these ESG criteria and mitigate sustainability risks, the fund aims to exclude issuers considered as highly oppressive regime that are deemed as threats to the global financial stability by the Financial Action Task Force. These exclusions have for instance led the fund to avoid any investment in Uzbekistan and Turkmenistan. In order to translate the promotion of environmental and social characteristics, governance and climate change along with social awareness are central to our ESG Integration approach applied across the fund's investment. Over the past year, the subfund initiated / reinforced positions in issuers with a positive ESG profile, based on Candriam's independent ESG rating assessment. To give expression to the fact that challenges relating to environmental, social and governance (ESG) have been taken into account, the ESG score is measured. At the end of the year 2021, the fund's ESG score was 42.4, compared to 42.8 for the benchmark.

### CANDRIAM BONDS Emerging Markets

CANDRIAM BONDS Emerging Markets is classified as article 8 under SFDR. The fund aims to promote environmental and social characteristics but does not have a sustainable investment objective. The fund's investment decisions take into account environmental, social and governance (ESG) criteria. These criteria are integrated in the management framework defined for the fund and can weight on investment decisions and position sizing. In order to take into account these ESG criteria and mitigate sustainability risks, the fund aims to exclude issuers considered as highly oppressive regime that are deemed as threats to the global financial stability by the Financial Action Task Force. These exclusions have for instance led the fund to avoid any investment in Uzbekistan and Turkmenistan. In order to translate the promotion of environmental and social characteristics, governance and climate change along with social awareness are central to our ESG Integration approach applied across the fund's investment. Over the past year, the subfund initiated / reinforced positions in issuers with a positive ESG profile, based on Candriam's independent ESG rating assessment. To give expression to the fact that challenges relating to environmental, social and governance (ESG) have been taken into account, the ESG score is measured. At the end of the year 2021, the fund's ESG score was 37.6, compared to 38 for the benchmark.

In order to translate the promotion of environmental and social characteristics, governance and climate change along with social awareness are central to our ESG Integration approach applied across the fund's investment. Over the past year, the subfund initiated / reinforced positions in issuers with a positive ESG profile, based on Candriam's independent ESG rating assessment. To give expression to the fact that challenges relating to environmental, social and governance (ESG) have been taken into account, the ESG score is measured. At the end of the year 2021, the fund's ESG score was 71.6, compared to 73.5 for the benchmark.

### CANDRIAM BONDS Euro Long Term

CANDRIAM BONDS Euro Long Term is classified as article 8 under SFDR. The fund aims to promote environmental and social characteristics but does not have a sustainable investment objective. The fund's investment decisions take into account environmental, social and governance (ESG) criteria. These criteria are integrated in the management framework defined for the fund and can weight on investment decisions and position sizing. In order to take into account these ESG criteria and mitigate sustainability risks, the fund aims to exclude issuers that have significantly and repeatedly violated one of the principles of the United Nations Global Compact or are significantly exposed to certain controversial activities. These exclusions have for instance led the fund to avoid any investment in companies such as Philip Morris International, involved in tobacco production, or Lafarge, active in thermal coal production. In order to translate the promotion of environmental and social characteristics, governance and climate change along with social awareness are central to our ESG Integration approach applied across the fund's investment. Over the past year, the subfund initiated / reinforced positions in issuers with a positive ESG profile, based on Candriam's independent ESG rating assessment. To give expression to the fact that challenges relating to climate change have been taken into account, the carbon footprint of companies is measured. At the end of the year 2021, the fund's carbon footprint was 63 tCO2-eq / million euro invested, compared to 87 tCO2-eq / million euro invested for the fund benchmark.

### Taxonomy (Article 6) :

The investments underlying of this financial product do not take into account the EU criteria for environmentally sustainable economic activities

### Taxonomy (Article 8)

The European taxonomy of green activities (the "Taxonomy") – Regulation (EU) 2020/852 is part of the EU's overall efforts to achieve the objectives of the European Green Deal and to enable Europe to achieve climate neutrality by 2050. This Regulation notably provides for six environmental objectives :

- Mitigation of climate change;
- Adaptation to climate change ;
- Sustainable use and protection of water and marine resources;
- The transition to a circular economy ;
- Pollution prevention and control ;
- Protection and restoration of biodiversity and ecosystems.

Both for investments managed directly and/or for the underlying funds managed by Candriam, the environmental aspects making up these six environmental objectives are at the heart of the ESG analysis of issuers. For sub-funds with a sustainable investment objective as well as for sub-funds which promote, among other characteristics, environmental and/or social characteristics, this work of evaluating the contribution of issuers to major environmental objectives, in particular the fight against climate change, requires a sectorial assessment, based on a set of heterogeneous data, complex realities with multiple interdependencies. Candriam's ESG analysts have also anticipated the entry into force of the criteria set by the EU and developed their own analytical framework. This makes it possible to systematically assess the contribution of a company's activities to various environmental objectives defined by Candriam and in line with the Taxonomy. Following the publication of the technical criteria for the 2 environmental objectives linked to climate change of the Taxonomy by the group of experts created at European level, Candriam undertook to integrate these criteria into its pre-existing analytical framework. Carrying out such an analysis on the entire scope of issuers concerned relies strongly on the effective publication of certain data by these key issuers, making it possible to assess their contribution in detail. Currently, few companies in the world provide the minimum data necessary to rigorously assess their degree of alignment with the Taxonomy. Thus, the lack of data allowing precise assessment of compliance with the criteria laid down by the Taxonomy does not yet make it possible to define a minimum percentage of alignment of these compartments with the European Taxonomy.
